AMENDMENTS

In the Claims:

- 1-10. (Canceled)
- 11. (Previously presented) A process for producing a chelating resin comprising: reacting a nucleophilic compound with carbon disulfide in a solvent, to form a carbodithioic acid;
 - neutralizing said carbodithioic acid with a base to form a carbodithioic acid salt; and reacting reactive sites on said carbodithioic acid salt with a crosslinking reagent in a solvent to form a solid chelating resin.
- 12. (Original) The process of claim 11 wherein said chelating resin comprises a (poly)dithiocarbamate resin.
- 13. (Original) The process of claim 11 wherein said nucleophilic compound comprises an amine.
- 14. (Original) The process of claim 13 wherein said amine comprises a polyamine.
- 15. (Original) The process of claim 14 wherein said polyamine comprises polyethyleneimine polyamine.
- 16. (Previously presented) The process of claim 11 wherein the molar ratio of carbon disulfide to reactive nucleophilic sites is from 0.1:1.0 to 0.9:1.0.
- 17. (Previously presented) The process of claim 16 wherein the molar ratio of carbon disulfide to reactive nucleophilic sites is from 0.3:1.0 to 0.7:1.0.
- 18. (Previously presented) The process of claim 11, wherein said nucleophilic reaction occurs at a pH of from 7.0 to 13.0.
- 19-23. (Canceled)
